

Learn all about space exploration with Spacekids

29 January 2009

Spacekids is delighted to present a new educational resource available from the Spacekids website.

The **learn** facility is a series of articles about space exploration, aimed at children of age four and up, and it is hoped that it will help with countless homework projects. The articles cover subjects including the most important events in the history of space exploration, the mighty machines that landed men on the moon and what astronauts eat in space.

At Spacekids we are keen to share our enthusiasm for space exploration, and are proud to offer what we hope will be a fun and educational learning facility that complements our great range of products.

Our toys have been selected for their educational value, either because of their suitability for role-based play, because of their accuracy, or because they inspire scientific learning. We believe that recent orders received from schools, and other educational facility confirms our view.

The **learn** facility is available from the Spacekids website homepage, at www.spacekids.co.uk.

Please email any queries to info@spacekids.co.uk

Spacekids is a UK based specialist online retailer. We sell space and adventure themed dressing up, toys, astronaut food, and other fun stuff, to spark the enthusiasm of the budding space explorer.
